Description			
<p>Some configuration is just repeated in all games. Some common aliases, macros, triggers and even channels. The idea would be to define "general-level" configuration. An easy solution is to create a settings/config.set file, as Moritz suggested, with the general configuration. The feature is almost supported as is, but some modifications to the user interface are needed:</p> <ul style="list-style-type: none">• For aliases, channels, macros and triggers, an additional list should be added to change its scope. General, world, or category. Although category-level configuration may not be available, it's good to think about this feature already.• Remember that changing the scope will mean changing the file in which these are saved, and perhaps the order.• World configuration has precedence over general configuration. One should be able to define a macro that overrides the general macro, for instance.• Remember to keep channels stored in worlds, to avoid conflict. It might be a good idea to separate them on the client itself.

- Category set to Customization

Very good idea. I thought we should have configuration on three layers: general (accessible to all worlds), world, and category. Categories would be like classes in other clients. One could have a category for combats, with macros, triggers, and aliases that are only active if you are in combat, for instance. Triggers could switch your active category to activate/remove existing configuration. This was on my mind, so a general configuration for macros, triggers, and aliases (and channels and whatever) makes total sense. Thank you for the suggestion!

#2 - 11/18/2017 11:39 AM - Vincent Le Goff

- Sprint/Milestone set to 15

#3 - 11/18/2017 11:58 AM - Vincent Le Goff

- Subject changed from General macros to General configuration (macros, aliases, triggers)

- Description updated

- Assignee set to Vincent Le Goff

#4 - 12/17/2017 03:50 PM - Vincent Le Goff

- Sprint/Milestone deleted (15)

Some work has been done, but time will not be sufficient to complete it for this sprint.
