| <b>Description</b><br>Whether using <a href="#">NVDA</a> or <a href="#">Jaws</a> on <a href="#">Microsoft Windows</a> , <a href="#">Orca</a> on Linux or <a href="#">VoiceOver</a> on Mac OS, supporting accessibility would be more than useful. Accessible MUD clients already exist on Windows, as it is, but they tend to be more scarce, if not absent, from Linux or Mac. Although CocoMUD client will attempt to be accessible on Windows at first, it would be very interesting to have the same level of accessibility on other platforms, perhaps even iOS and <a href="#">Android</a> . |                   |
